

Use Case Specification

UC-01: Create Assessment

Objective: Create a new assessment

Primary Actors: Administrator, Manager

Trigger: An administrator or a manager selects the option to create a new assessment

Secondary Actors: Assessment Document Database

Preconditions:

1. User is logged in
2. User has manager permissions to create an assessment

Post Conditions:

1. Assessment Document Database sends an assessment by email

Main Success Scenario:

1. User navigates to assessment page
2. User selects “Create New Assessment”
3. User selects name or email of employee being assessed
4. User confirms selection
5. Assessment Document Database sends assessment

Variations:

Variation ID: UC-01 VAR-01

1. User navigates to assessment page
2. User selects “Create New Assessment”
3. User selects name or email of employee being assessed
4. User exits assessment page

Variation ID: UC-01 VAR-02

1. User navigates to assessment page
2. User selects “Create New Assessment”
3. User selects name or email of employee being assessed
4. User selects “Add An Additional Evaluator”
5. User selects name or email of evaluator
6. User confirms selection
7. Assessment Document Database sends assessment

Failure Variation:

Variation ID: UC-01 VAR-01-F

- 3a. User defines new questions to add to assessment
- 3b. User exits assessment page
- 3c. Assessment Document Database is not updated

UC-02: Get Individual Results

Objective: View results of an individual assessment

Primary Actors: Manager, Employee

Trigger: An employee selects the option to view the results of an individual assessment

Secondary Actors: None

Preconditions:

1. User is logged in
2. User has permissions to view the results of the assessment

Post Conditions:

1. None

Main Success Scenario:

1. User navigates to assessment page
2. User selects “View Results of Assessment”
3. User selects which assessment to view
4. User opens assessment results

Variations:

Variation ID: UC-02 VAR-01

1. Manager navigates to assessment page
2. Manager selects “View Results of Assessment”
3. Manager selects which employee to inspect
4. Manager selects which assessment to view
5. Manager opens assessment results

Failure Variation:

Variation ID: UC-02 VAR-01-F

- 2a. User Selects “View Results of Assessment”
- 2b. There are no assessments to view
- 2c. User exits results page

UC-03: Compare Individual Assessment Results

Objective: Compare the results of multiple individual assessments

Primary Actor: Manager

Trigger: Manager selects the option to compare the results of individual assessments

Secondary Actors: None

Preconditions:

1. User is logged in
2. User has manager permissions

Post Conditions:

1. None

Main Success Scenario:

1. Manager navigates to assessment page
2. Manager selects “Compare Results”
3. Manager selects which employees to compare
4. Manager selects which assessment results to compare
5. Manager opens comparison results
6. Manager saves comparison results

Variations:

Variation ID: UC-03 VAR-01

1. Manager navigates to assessment page
2. Manager selects “Compare Results”
3. Manager selects which employees to compare
4. Manager selects which assessment result to compare
5. Manager opens comparison results
6. Manager selects “Add Employee”
7. Manager selects employee to add to comparison
8. Comparison results are updated
9. Manager saves comparison results

Variation ID: UC-03 VAR-02

1. Manager navigates to assessment page
2. Manager selects “Compare Results”
3. Manager selects which employees to compare
4. Manager selects which assessment result to compare
5. Manager opens comparison results
6. Manager selects “Remove Employee”

7. Manager selects employee to remove from comparison
8. Comparison results are updated
9. Manager saves comparison results

Failure Variation:

Variation ID: UC-03 VAR-01-F

- 5a. Manager opens comparison results
- 5b. Manager exits comparison page
- 5c. Comparison results are not saved
