Team 41: HR Support App – Actor Goals

As an Administrator I'd like to create assessments so that I can choose how employees are to be assessed for their performance.

As a Manager I'd like to create, view, and perform assessments as well as compare individual's assessments so that I can effectively understand the strengths and weaknesses of my employees – both over time and as compared to others.

As an Evaluator I'd like to perform assessments of others so that I can evaluate their performance as instructed to.

As an Employee, I'd like to take assessments so that I can receive feedback from my Manager.
